

EJEMPLOS DE CONSTRUCCIÓN DE COCHES

plastic corrugated board as body and housing for axles

use found objects like paper rolls as body

sometimes a car doesn't need 4 wheels, it just has to make it to the finish line

minimally built cars

binder clip axles

chip board wheels

grommets

wings to catch wind, an idea to slow your car down

bristol board

minimal wireframe body

with the axles exposed you can apply friction to slow down your vehicle

washer wheels

add washers for extra weight, which helps keep your car going fast

a lot of box construction and origami design possibilities here

start simple

plywood body

carriage for passengers
